

Keynote Test Perspective 3.0

Keynote Test Perspective is a cost-effective, completely self-service Web site load testing tool. With Test Perspective you can run the most realistic load tests on-demand and receive immediate feedback on modifications you make to your Web site.

- Self-Service Load Testing Portal
- Simplified Process
- Unified Dashboard View
- Team Friendly

Keynote Test Perspective® is a hosted, self-service Web site load-testing tool that saves you time and money associated with purchasing and deploying load-testing software and hardware. With Test Perspective you will have access to Keynote's standardized global test and measurement network to run the most realistic and repeatable load tests on demand.

The Keynote Difference

Dedicated systems on the Keynote Global Network deliver consistent and repeatable load conditions. Keynote never rents capacity on shared infrastructures and never relies upon end-user populations that can change from test to test.

Test Perspective utilizes our global test and measurement network that includes load-generating agents from multiple geographic locations and Internet backbones. The impact of distance and network latency will impact your real users, so we provide a standardized testing environment, hosted on the public Internet for every test.

Self-Service puts you in control

Test Perspective was designed with a "zero learning curve" goal. The step-by-step guided workflows and clean interface allow you to setup and run tests in just minutes. Whether you are an agile team with a weekly sprint, a performance analyst making daily changes, or a large team focusing on seasonal milestones, we think you'll enjoy the streamlined environment and direct control you hold over the process. Test Perspective frees you from waiting for a vendor or consultants to perform behind-the-scenes setup. Just script, schedule and go!

Streamlined guided workflows let you focus on what really matters, making your application perform.

Create Load Test

Select connection speeds for virtual users to emulate

Ratio (%)	%	Name	Speed (kbps)
<input type="text" value="0"/>	<input type="text" value="0.00"/>	Dial-Up	56
<input type="text" value="2"/>	<input type="text" value="14.29"/>	2.5G Wireless	128
<input type="text" value="5"/>	<input type="text" value="35.71"/>	3G Wireless	768
<input type="text" value="0"/>	<input type="text" value="0.00"/>	DSL	1000
<input type="text" value="2"/>	<input type="text" value="14.29"/>	Cable (basic)	5000
<input type="text" value="5"/>	<input type="text" value="35.71"/>	Cable (high)	16000
<input type="text" value="0"/>	<input type="text" value="0.00"/>	Data Center	100000

Previous

Flexible usage model – focus on the testing you need to do today, not buying more licenses

With Test Perspective, there are no pre-set user limits or new licenses to buy when you want to validate higher load levels. Just schedule your test and see an instant estimate of how many Virtual User Minutes the test will consume from your account. With our generous “pay only for what you use” accounting, you pay less for ramp-up periods and shorter or aborted tests.

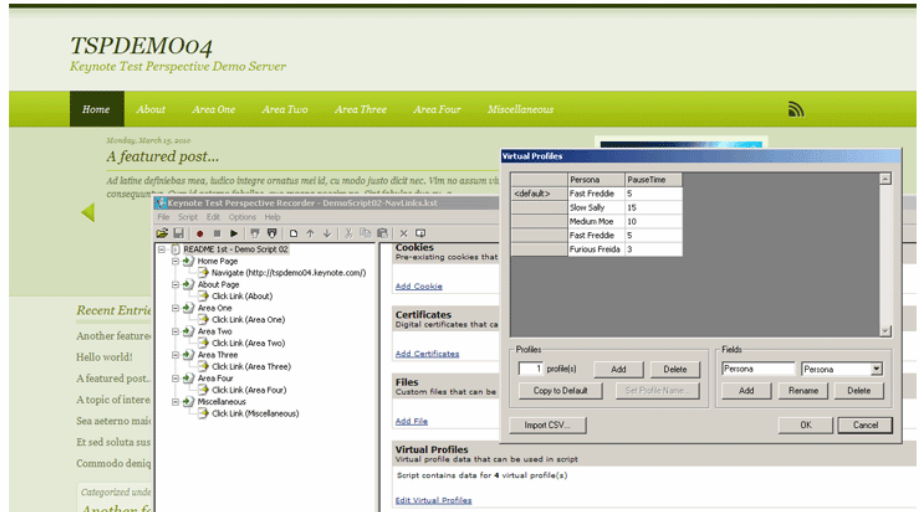

See the impact of Keynote’s “pay only for what you use” accounting as you set up any test:

Select the duration and quantity of load

Test Duration: (minutes)	<input type="text" value="30"/>	
Peak Virtual Users: (virtual users)	<input type="text" value="15000"/>	
Time to Reach Peak: (minutes) [?]	<input type="text" value="30"/>	
Account Balance before test:	1000000 vu-mins	As of 08/09/10 13:59
Estimated VU-minutes for this test:	225000	
Estimated Account Balance post-test:	775000 vu-mins	

Working Examples & Practice Server

We want you to get up and running fast. To make it easy, we provide a ready-to-go test site and pre-recorded scripts that exercise our site so that you can learn the ropes in 15 minutes or less. Each of the working example scripts includes a thorough description of the features that it demonstrates. Pop open the online help, download the scripts to your desktop and open them in the Test Perspective Recorder. Within minutes it is if you are looking over the shoulder of someone who's been there before you.

Unified Dashboard View

View all the live load testing indicators on a single screen. Easily configure the screen for large displays or laptops. Watch in real time as virtual users expose symptoms of system overload.

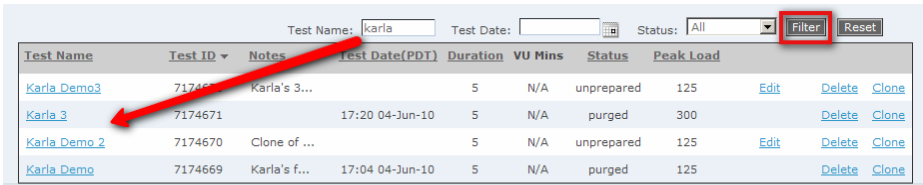

Real-time testing dashboard is available to every member of your team.

Team Friendly

Easily filter scripts or tests to see just “your” load testing information at a glance. Create “viewer” accounts for colleagues who should see but not edit or launch tests. Delegate responsibility but maintain account control with Administrator and Power User roles. All of this control is just a few mouse clicks away in the 100% self-service “My Account” tab.

Sharing Test Perspective in a team environment? Quickly filter your tests or scripts to find just the one you need:

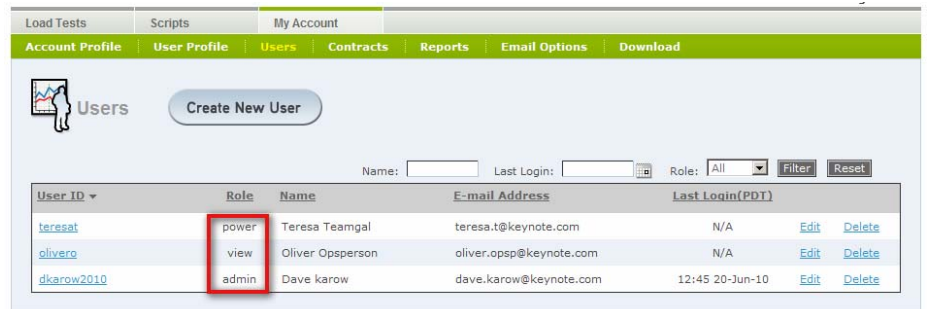

Test Name	Test ID	Notes	Test Date(PDT)	Duration	VU Mins	Status	Peak Load

Three levels of user roles allow you to grant access and delegate responsibility with just the right level of control. “Power” users can create, schedule, cancel and delete tests. “View” users are limited to observing tests and viewing post-test results. “Admin” users can perform any action, including creating and deleting any type of user. With Test Perspective you are in control and you move at your own speed!

Integrated user management with roles for Power, View and Admin users:

User ID	Role	Name	E-mail Address	Last Login(PDT)		
teresat	power	Teresa Teamgal	teresat@keynote.com	N/A	Edit	Delete
olivero	view	Oliver Opperson	oliver.opsp@keynote.com	N/A	Edit	Delete
dkarow2010	admin	Dave karow	dave.karow@keynote.com	12:45 20-Jun-10	Edit	Delete
