

ONLINE AIRLINE TRAVEL STUDY

Wave 1
Customer Experience Rankings®
Service Level Rankings

Abstract

Research Objectives

The Keynote Rankings for Airline Travel Web Sites are part of a syndicated competitive intelligence program for understanding and improving customer service and service levels of leading Web businesses.

Keynote's mission is to improve eBusiness performance worldwide by providing metrics and insights for customer experience, marketing effectiveness, application service levels and competitive strategies.

Study Participants

For the study of Airline Travel Web sites, Keynote monitored over 2264 panelists, with 200 visiting each site. The Panelists were profiled for US, online adults (18+) who plan to use the Internet to research or book air travel within the next 12 months. The sites tested were:

- American Airlines
- Continental Airlines
- Delta airlines
- Expedia
- JetBlue Airways
- Northwest Airlines
- Orbitz
- Southwest Airlines
- Travelocity
- United Airlines
- US Airways

Methodology Overview

Measuring Customer Experience

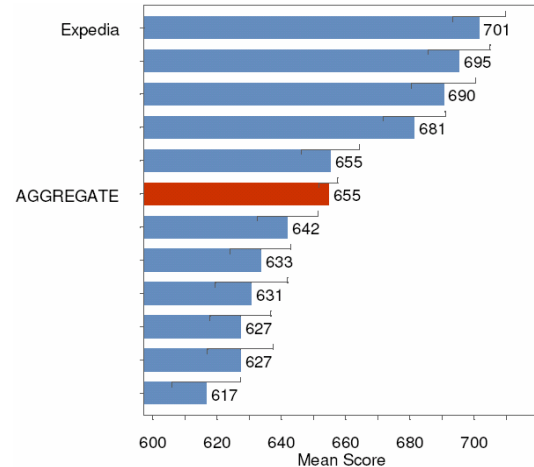

Keynote's approach to customer research involves real consumers performing tasks on target websites, and using Keynote's *WebEffective®* application to measure attitudes and behaviors of the users. For this study, the consumers were asked to pursue goals and provide their reactions across a number of areas of site experience.

Measuring Service Levels

To gather data on the operational excellence of sites in a study, Keynote uses its Transaction Perspective automated testing agents to mimic the actions of a consumer using the Internet Explorer browser to perform scripted tasks. The agents are deployed through out Keynote's Global Network, and will perform these tasks at least hourly for a 30 day period. The agents track more than 35 performance metrics and collect over 6500 data points to rank the sites in the study on each of seven key performance factors.

Overall CE Ranking

The overall Keynote Customer Experience Ranking is the highest-level score of customer experience and is based on an aggregate score of site performance across all 250 customer experience indices and metrics measured in the study. The overall ranking shows which sites are most successful in terms of satisfying customers, driving acquisition and supporting the company's brand.

Differences of approximately 21 points or more are significant at the 90% confidence level.

Specific areas of Success

The best sites are determined by their ability to drive leading business outcomes such as customer satisfaction, brand impact and acquisition. Winners in some of the areas measured are:

Rank	Brand Impact Index
1	Expedia
2	Southwest
3	Travelocity

Rank	Conversion Impact
1	Expedia
2	Travelocity
3	Orbitz

Service Level Results

Using Extensive measurement data and analysis, Keynote benchmarked leading online mapping sites in two major categories:

Reliability – Measures a site’s ability to service its customers without errors or outages. Reliability is based on detailed measurements focused on two Key Factors:

- Availability
- Outages.

Rank	Reliability
1	Southwest
2	JetBlue
3	Continental

Responsiveness – Measures a site’s ability to provide highly responsive and consistent page downloads. To obtain the overall Responsiveness Ranking, Keynote evaluates and compares the sites according to their performance on five Key Factors:

- High Speed Response
- Dial-up Response
- Response Time Consistency
- Geographic Uniformity
- Load Handling

Rank	Responsiveness
1	JetBlue
2	American
3	Southwest

High error and outage rates, major load handling issues and the poorest and most variable overall performance plague the Travel segment more than any other vertical Keynote studies.

Keynote Drivers

Critical insights of the study are derived from understanding why sites rank as they do. Keynote conducted a sophisticated driver analysis to determine which aspects of the site experience had the most significant impact on site success. The factors that have the greatest relationship to these site effectiveness indices reveal which areas of the site experience should get the most attention in order to improve critical site outcomes.

Keynote competitively benchmarks sites across these drivers – and determines the key factors contributing to success in these areas.

The drivers that had the most influence on brand impact and future use were **Price, Design and Support**.

TOP IMPACT DRIVERS	BRAND IMPACT	CONVERSION
	Correlation to Brand Impact Index	Correlation to Conversion
1. Price Satisfaction	■■■■■	■■■■■
2. Design & Organization	■■■■■	■■■■■
3. Help and Support	■■■■■	■■■■■
4. Ease of Booking	■■■■■	■■■■■
5. Flight Availability	■■■■■	■■■■■
6. Ease of Finding Flight	■■■■■	■■■■■
7. Multiple Service Availability	■■■■■	■■■■■
8. Site Performance	■■■■■	■■■■■
9. Loyalty Points Support	■■■■■	■■■■■

■■■■■ = The highest partial correlation of driver to index

Qualitative Analysis

The Keynote research team uses specialized tools to analyze participant comments, identifying and comparing themes across all of the sites in the study.

Here are some comments from our study participants:

“Too many options available at the start. I think the site would be better if it offered a broad search first and then narrow according to specific criteria.”

“I never use a travel advisor. But I will use a travel deal site, early on to find great deals that I may want to consider.”

“Very thorough and clear as to what I was getting. The updated price was always visible. The selection of other attractions was fun to scan and pick out.”

Results Availability

This abstract highlights findings from the KCR Online Airline Travel Research Report. The full report contains hundreds of pages that include information not only identifying the best and worst lodging sites, but also providing specific detail about why the sites ranked where they did. Armed with this intelligence, site managers and developers can tune specific aspects of their application to provide better performance to customers than their competition.

Custom Comparisons

Not included in the study? Need to see where you rate against the top site? Keynote's researchers can create an expansion study to collect the same metrics on your site, and profile your results against the sites in this study. Conducting a study is a straightforward process:

About Keynote Systems

Keynote Systems, Inc., the Mobile and Internet Performance Authority is the worldwide leader in eBusiness performance management services. Over 2100 corporations and 19,000 individual subscribers rely on Keynote's growing range of measurement, monitoring and customer experience management services to improve eBusiness performance by reducing costs, improving customer satisfaction and increasing profitability. Keynote's products provide enterprises with the tools to align IT and Business goals.
