Keynote Rankings for Retail-Electronics Web Sites

July 2006

Keynote's Mission: Improve eBusiness Success

Keynote's mission is to improve eBusiness performance worldwide by providing metrics and insights into customer experience, operational excellence, and competitive strategies on the Web.

The *Keynote Customer Experience Rankings for Retail Electronics Web Sites* and the *Keynote Service Level Rankings for Retail Electronics Web Sites* are part of a syndicated competitive intelligence program designed to benchmark and improve the operational and business performance of leading Web businesses.

The rankings are based on large-scale studies that employ Keynote's unique methodology and expertise to provide comparison metrics and insights into best practices. Unlike other research, Keynote's approach uses actual consumer behavior and feedback, in addition to quantitative measures of site reliability and responsiveness, to provide a detailed understanding of the impact that Web sites have on consumer perceptions and behavior.

Keynote Methodology Overview

Measuring Customer Experience

Keynote's proprietary approach to customer experience research measures real people as they pursue real tasks on the Web.

By capturing customer feedback and behavior at the point of interaction with a site, and with accurate knowledge of their intent, Keynote is able to provide a complete understanding of their online experience and how it relates to business goals. This realistic and in-depth view of the customer experience links companies with their customers and prospective customers and helps them to truly understand what they think, how they behave—and why.

For the *Keynote Customer Experience Rankings for Retail Electronics Web Sites*, Keynote monitored over 2,000 prospective retail customers as they interacted with the following Web sites:

- Amazon.com
- Best Buy
- Buy.com
- CDW
- Circuit City
- Dell
- Office Depot
- Overstock.com
- Staples
- Wal-Mart

The prospective customers were asked to pursue goals and provide their reactions across a number of areas of site experience. Consumers provided their reactions and answered questions while Keynote recorded their behavior and captured their responses using the proprietary Keynote customer experience methodology. More than 250 metrics were measured for each site included in the study.

Keynote then assessed the impact of the user's experience through a range of indices and a driver analysis to better understand which sites delivered the best business outcomes, and what were the key drivers behind this success.

Keynote Methodology

Measuring Service Levels

To gather data on the operational excellence or service levels of sites in a study, Keynote uses its Transaction Perspective® measurement computers (“agents”) to mimic the actions of a consumer using the Internet Explorer browser. The agents used for this study were located throughout the U.S. and were connected to the Internet from both broadband and dial-up connections. The agents performed transactions, collecting details of site performance and reliability during a one month period. The agents tracked more than 40 detailed performance metrics and collected over 6500 data points on each site. Keynote analysts used these data points to rank the sites in the study on each of seven key performance factors, which are critical aspects of the operational excellence of a retail site.

Results: Customer Experience

Best Sites

The overall Keynote Customer Experience Ranking is the highest-level score of customer experience and is based on an aggregate score of site performance across all 250 customer experience metrics measured in the study. The overall ranking shows which sites are most successful in terms of satisfying customers, driving customer acquisition, and supporting the company’s brand.

Of all the sites included in the study, Amazon.com was the most successful overall, providing the most effective online experience for retail electronics customers.

Keynote Customer Experience Ranking

Rank	Retail–Electronics Web Sites
1	Amazon.com

Specific Areas of Success

The best sites are determined by their success in driving business outcomes including customer satisfaction, brand impact and customer conversion (acquisition). The study benchmarks site success in each of these specific areas.

Brand Impact Index

Rank	Retail–Electronics Web Sites
1	Amazon.com

The Amazon.com site was also the top rated sites in terms of positive brand perceptions. Customers using sites topping the Brand Impact Index were generally more satisfied, experienced less frustration, and ultimately formed a more favorable impression of the brand as a result of their experience on these sites.

Conversion Impact Index

Rank	Retail–Electronics Web Sites
1	Amazon.com

Amazon.com also led the Conversion Impact Index. Prospective customers visiting sites topping the Conversion Impact Index were more likely to state an intention to purchase an item or return to those sites in the future.

Success Drivers and Best Practices

Keynote also conducts a sophisticated statistical driver analysis to determine which aspects of site experience had the most impact on site success. This driver analysis not only explains “why” sites perform the way they do, but also demonstrates which areas of improvement the sites should focus on in order to have the biggest impact on their desired business outcomes.

The drivers that had the most impact on areas such as customer conversion (acquisition) and brand affinity were visual appeal of the site, price satisfaction, customer support and search satisfaction.

Top Impact Drivers

Rank	Retail–Electronics Web Sites
1	Visual Appeal
2	Price Satisfaction
3	Customer Support
4	Product Research

Keynote then competitively benchmarks sites across these drivers—and determines the key factors contributing to success in these areas.

Customer Support

Rank	Retail–Electronics Web Sites
1	Overstock.com
2	Amazon.com
3	Best Buy

For instance, the Overstock.com, Amazon.com and Best Buy sites topped the Customer Support rankings.

Qualitative Feedback

To better understand why sites perform the way they do on a given driver, Keynote analysts review the best of breed sites in conjunction with the qualitative feedback provided by panelists during the study.

In the Customer Support category, prospective customers particularly liked the availability of live chat with customer support on Overstock.com and the categorization of help topics on Amazon.com.

Overstock.com Feedback

Availability of live chat

- “The live chat with a shopping concierge popped up. If I was really going to buy, I could have chatted and asked questions. I like that.”
- “I like that there is an option to contact customer service via chat at any time.”

Ease of finding help

“The ‘Need Help’ was right on the top in bold red great idea!”

Helpful FAQ topics

"The listing of possible topics was clear and informative."

Searchable help

"I clicked the 'Help' button and typed in "Price Change" and found the information I was looking

Results: Service Levels**Best Sites**

Using extensive measurement data and analysis, Keynote benchmarked leading Books & Music Retail sites in two major categories,

Reliability – Measures a site's ability to service its customers without errors or outages

Responsiveness – Measures a sites' ability to provide highly responsive and consistent page downloads

Reliability

To obtain the overall Reliability Ranking, Keynote evaluates and compares the sites according to their performance on two Key Performance factors, both of which are comprised of several underlying metrics:

- Availability
- Outages

Keynote Service Level Ranking Reliability, June 2006

Rank	Retail–Electronics Web Sites
1	CDW

The CDW site was the top rated site in terms of reliability, indicating the site provided better reliability than its direct competitors.

Responsiveness

To obtain the overall Reliability Ranking, Keynote evaluates and compares the sites according to their performance on two Key Performance factors, both of which are comprised of several underlying metrics:

- High Speed Response
- Dial-up Response
- Response Time Consistency
- Geographic Uniformity
- Load Handling

Keynote Service Level Ranking Responsiveness, June 2006

Rank	Retail–Electronics Web Sites
1	Circuit City

The Circuit City site was the industry's best in terms of site responsiveness, an indication of how fast the site was in comparison to its competitors.

In part because loads have increased significantly over the past year, many retail sites are not prepared for the holiday load and are having trouble handling current Summertime visitor loads. Some major retail sites are having difficulty staying up to industry standard 99.5% availability, and most all sites are experiencing small outages.

Keynote Rankings for Retail Web Sites

This abstract highlights findings the *Keynote Customer Experience Rankings for Retail Web Sites* and the *Keynote Service Level Rankings for Retail Web Sites* studies. The full studies contain hundreds of metrics and include additional information not only identifying the best and the worst Web sites in certain categories, but also providing specific detail about why the sites ranked where they did. The following measurements provide additional insight:

Keynote Drivers

Critical insights of the study are derived from understanding why sites rank as they do. Keynote conducted a sophisticated driver analysis to determine which aspects of the site experience had the most impact on site success. The factors that have the greatest relationship to these site effectiveness indices reveal which areas of the site experience should get the most attention in order to improve critical site outcomes.

Cross-Site Segmentation

Segmentation provides insights about how certain customer profiles interact with and respond to each site in the study. Keynote compares key metrics across the largest and key segments of the industry, such as high income individuals.

Qualitative Analysis

Using special qualitative analysis tools, the Keynote research team analyzes participant comments to identify and compare common themes across all of the sites in the study. Since our qualitative algorithms are the same across each of the reports, these tools provide a fair and quantitative way to compare customer verbatims across reports.

Web Norms Comparisons

Participants in the study do not compare their site experiences just among competitors in a particular industry; they also compare their experiences to those presented by other types of sites. Keynote provides site comparisons against larger web norms so that companies not only know how they compare to their own industry averages, but also to web norms across industries. Keynote web norms are derived from hundreds of evaluations run across many major industries.

Longitudinal Comparisons

Keynote Rankings provide a solid base for longitudinal comparisons and benchmarking. Each iteration of the study uses a similar study design, and the analysis is based upon standard Keynote metrics, resulting in data that can be easily benchmarked and compared over time.

Keynote Systems

Keynote Systems, The Internet Performance Authority®, is the worldwide leader in e-business performance management services. Over 2,300 corporate IT departments and 13,000 individual subscribers rely on Keynote's growing range of measurement and monitoring, service level and customer experience management services to improve e-business performance by reducing costs, improving customer satisfaction and increasing profitability.
