

Keynote Partners With ExtraHop

IT Business Edge

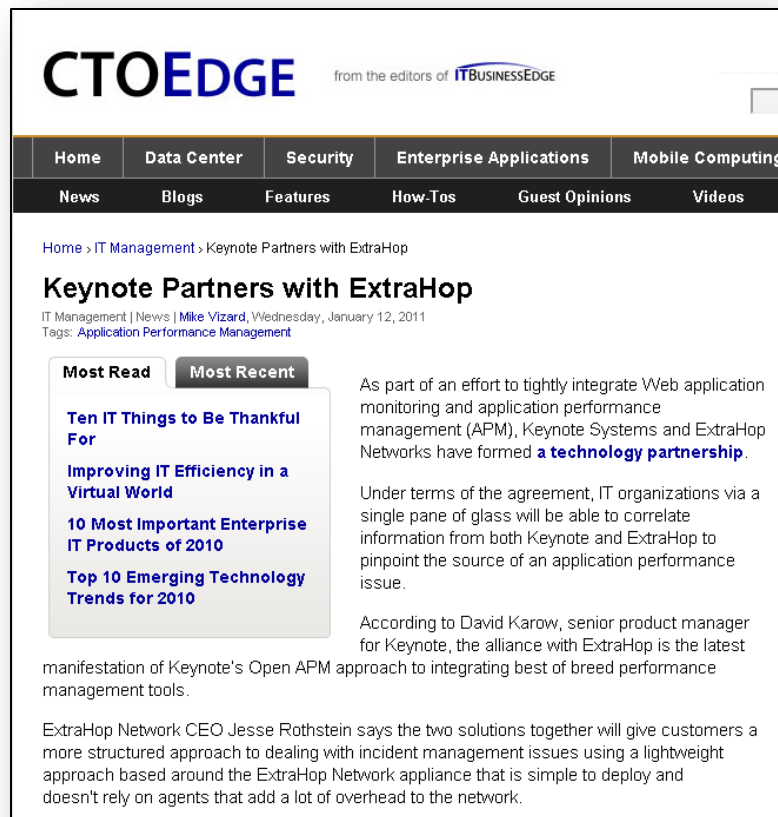

Mike Vizard
January 12, 2011

As part of an effort to tightly integrate Web application monitoring and application performance management (APM), Keynote Systems and ExtraHop Networks have formed [a technology partnership](#).

Under terms of the agreement, IT organizations via a single pane of glass will be able to correlate information from both Keynote and ExtraHop to pinpoint the source of an application performance issue.

According to David Karow, senior product manager for Keynote, the alliance with ExtraHop is the latest manifestation of Keynote's Open APM approach to integrating best of breed performance management tools.

ExtraHop Network CEO Jesse Rothstein says the two solutions together will give customers a more structured approach to dealing with incident management issues using a lightweight approach based around the ExtraHop Network appliance that is simple to deploy and doesn't rely on agents that add a lot of overhead to the network.

The screenshot shows the CTOEDGE website interface. At the top, the logo 'CTOEDGE' is displayed with the tagline 'from the editors of ITBUSINESSEDGE'. Below the logo is a navigation menu with categories: Home, Data Center, Security, Enterprise Applications, and Mobile Computing. A secondary menu includes News, Blogs, Features, How-Tos, Guest Opinions, and Videos. The main content area features a breadcrumb trail: Home > IT Management > Keynote Partners with ExtraHop. The article title is 'Keynote Partners with ExtraHop', dated January 12, 2011, by Mike Vizard. The article text is partially visible, starting with 'As part of an effort to tightly integrate Web application monitoring and application performance management (APM), Keynote Systems and ExtraHop Networks have formed a technology partnership.' A sidebar on the left contains a 'Most Read' section with links to 'Ten IT Things to Be Thankful For', 'Improving IT Efficiency in a Virtual World', '10 Most Important Enterprise IT Products of 2010', and 'Top 10 Emerging Technology Trends for 2010'. A 'Most Recent' section is also present.
